## Simplicity at a low cost! The Testra pD

The Testra pD is a single-channel, dedicated pressure decay leak tester designed for accurate and repeatable leak testing. Its ease of use, combined with the engineering and technical expertise of Uson, delivers essential features and value.

The Testra pD's pressure range is adjustable from 0 psi to 60 psi, while its small footprint makes it perfect as a bench top tester.

Start testing right out of the box! Easy to set up and simple to use, the Testra pD is ideal for users who want repeatable, reliable results for uncomplicated applications.

Testra pD — perhaps the world's simplest attribute gauge.

### Specifications

Test technique: Pressure decay  
 Pressure range: 0-60 psi / 0-4 bar  
 Number of channels: One  
 Program storage: 99 programs, linkable  
 Engineering units: User selectable  
 Language: English only  
 Communications: RS232, PLC I/O  
 Display: LCD  
 Regulator: Manual  
 Dimensions: 9.5 x 8.5 x 13.75 inches  
 238 x 216 x 350 mm  
 Security: Lockable programming switch
